

Operation Barbarossa: the Complete Organisational and Statistical Analysis

Full Table of Contents, Part I

The Concepts and General Structure of the Integrated Land and Air Resource Model

1. Studying Military History Using Operational-Strategic Simulations

- 1) The Evolution of Military Simulations and War Gaming
- 2) The Power of Military Simulations in the Study of Military History
- 3) The Difference between Qualitative and Quantitative Analysis
- 4) Tactical, Tactical-Operational, Operational and Strategic Military Simulations
 - a. The Tactical Level
 - b. The Tactical-Operational Level
 - c. The Operational Level
 - d. The Strategic Level

2. The Integrated Land and Air Resource Model

- 1) What is an Integrated Land and Air Resource Model?
 - a. The Underlying Principles
 - b. The Fully Integrated Land and Air Resource Model (FILARM)
 - c. Partially Integrated Land and Air Resource Model (PILARM)
 - d. Naval Forces Involved in Operation Barbarossa
- 2) The Objectives of the Integrated Land and Air Resource Model
 - a. The Strategic Context of the Military Campaign: Bottlenecks in the Mobilisation Process
 - b. The Actual Personnel and Equipment Present
 - c. Combat Unit Mobility
 - d. Efficiency of Supporting Infrastructures
 - e. Replacements
 - f. New Equipment
 - g. Operational Freedom of Action

3. The Structure of the Fully Integrated Land and Air Resource Model (FILARM)

- 1) Resource Sources, Destinations and Paths outside the FILARM Model
- 2) Resource Reallocation Paths within the FILARM Model
- 3) Resource Allocation States inside the FILARM Model
 - a. Combat Units: D, MD and MND
 - i. Deployed (D)
 - ii. Mobilised and Deployed (MD)
 - iii. Mobilised and Not Deployed (MND)
 - b. Supply and Support Infrastructure
 - c. Reserves and Replacements (R)
 - i. Replacements (R)
 - ii. Campaign Start Reserves
 - iii. Campaign Reserves
- 4) Combat Unit Processes inside the FILARM Model
 - a. Checking the TOE Authorisation of a Deployed (D) Combat Unit
 - b. Check the TOE Authorisation of a MD or MND Combat Unit
 - c. The Combat Process
 - i. Key Terms and Concepts used in the Combat Process
 - ii. Outcomes of the Combat Process
 - d. The Attrition Process
 - i. Outcomes of the Attrition Process
 - e. The Disband and Shatter process
 - i. Combat Unit Shattering
 - ii. Combat Unit Disbandment

4. The Structure of the Partially Integrated Land and Air Resource Model (PILARM)

- 1) Resource Sources, Destinations and Paths outside the PILARM Model
- 2) Resource Allocation States inside the PILARM Model
 - a. Combat Units: D and Reinforcement Units
 - i. Deployed (D)
 - ii. Reinforcement Units
 - b. Reserves and Replacements (R)
 - i. Replacements (R)
 - ii. Front Campaign Reserves
- 3) Combat Unit Processes inside the PILARM Model
 - a. Checking the TOE Authorisation of a Reinforcement Combat Unit
- 5. The Order of Battle (OOB): the Force Deployment Matrices**
- 6. Tables of Organisation and Equipment (TOE)**
 - 1) TOE Representation in a Table Format
- 7. The Heterogeneous Model vs. the Homogeneous Model**
 - 1) The Heterogeneous Model
 - 2) The Homogeneous Model and the Use of Checksums
- 8. Supply Distribution Efficiency (SDE)**
 - 1) Supply Lift
 - 2) Supply Demand
- 9. A Divisional Sized or Division Equivalent Combat Unit in WWII**
 - 1) What was a Divisional Sized Combat Unit in 1941?
 - 2) Measuring Whether a Combat Unit can Reasonably be Called a Divisional Sized Combat Unit

Sample Only
